## **Overview**

AidData’s Financing the 2030 Agenda for Sustainable Development Dataset Version 1.0 provides aggregated data on Official Development Assistance (ODA) and Other Official Flow (OOF) commitments to the 17 Sustainable Development Goals (SDGs). This release builds on the previous iteration of the SDG coding methodology released in November 2017 (*Estimating Baseline Aid to the Sustainable Development Goals*). This release uses novel machine learning tools to automate this methodology and expand coverage through 2021.

AidData’s Autocoding Finance for Sustainable Development methodology is based on an analysis of ODA project descriptions and involves four steps: (1) a mapping between first-level activities and SDG targets; (2) training a text-classification tool leveraging three text-classification models on a dataset where this mapping has been hand-coded, then processing new data with this tool; (3) splitting an aid project across designated activities; and (4) splitting the dollar value of an aid project across the associated goals (for further detail, see *Autocoding Finance to the Sustainable Development Goals Methodology, forthcoming, AidData*). These steps allow us to estimate the total aid at the goal level for each of the SDGs.

The dataset was developed by AidData with the generous support of the William and Flora Hewlett Foundation.

A forthcoming version 1.1 data release will also include the full, unaggregated project-level data. However, as this dataset contains over 3.2 million project entries, we believe that a release of partially aggregated data will be most useful to the general research audience.

## **Data Coverage**

**Scope:** Disbursements from DAC and non-DAC donors as captured by the OECD CRS Database. Aggregated by year, donor, and recipient.

**Flows Covered:** Official Development Assistance Grants, Official Development Assistance Loans, Other Official Flows (Non Export Credit), Private Development Finance, Equity Investment.

**Year Coverage:** 2010-2021

**Donors:** 157

**Geographical Coverage:** All ODA-eligible countries (totaling 155 countries/territories, plus 23 additional unspecified regional aggregates)

**Total Variables:** 46

**Row Count:** 82959

**Total Disbursement Amount (2020 USD):** \$ 3,025,513,907,335

**Total SDG-related Disbursements (2020 USD):** \$ 2,307,005,046,643

## **Files Included**

The Financing the 2030 Agenda for Sustainable Development Dataset, Version 1.0 is made available in a zipped file with the following files:

<b>File Name</b>	<b>Description</b>
README_Financing_2030_SDGs_v1.0.pdf	A README document describing the dataset, license and attribution information, and updates to the methodology from the v1.0 methodology document.
aiddata_financing_2030_sdgs_donor_recip_year_v1.0.csv	A smaller pre-aggregated file of disbursements from DAC and non-DAC donors as captured by the OECD CRS Database. Aggregated by year, donor, and recipient.

## Field Definitions

Field Name	Definition
year	The year of the recorded disbursement
donor_code	Numeric donor code, derived from OECD CRS database. For the full list, see <a href="#">Appendix A: Donor Code List</a> .
donor_name	Donor name. For bilaterals and private development finance, this is the name of the sovereign government (i.e. France, Saudi Arabia). For multilaterals this gets slightly more confusing – it is the name of the donor, and soft/hard lending windows may be treated as separate donors (i.e. IDA & IBRD are listed as separate donors, AFDB & AFDF are listed as separate donors).
recipient_code	Numeric recipient code, derived from OECD CRS database. For the full list, see Appendix B: Recipient Code List.
recipient_name	The sovereign country that is the recipient of the project. This is often referred to as the partner country in recent aid literature. This includes regional or sub-regional aggregates that do not have a specified country recipient. While flows often are ultimately directed to NGOs or other partner institutions, we rely on the top-level country aggregate.
recipient_region	Regional grouping for recipient country, derived from the <i>U.S. Department of State Facilities and Areas of Jurisdictions</i> list. Available from <a href="https://www.state.gov/countries-and-areas-list/">https://www.state.gov/countries-and-areas-list/</a>
disbursement	Aggregated sum of total reported disbursements by the donor to a recipient in a given year, in 2020 Constant USD. This value is equal to the dollar sum across the “_sum” suffixed columns.
total_proj	Total count of projects with a disbursement value greater than zero directed from the donor to a recipient in a given year.  Note: the SDG coding process applies multiple goal codes to projects that address multiple thematic areas at once, therefore this count may not equal the sum across the “_n_proj” suffixed columns.
sdg_1_sum, sdg_2_sum, sdg_3_sum, sdg_4_sum, sdg_5_sum, sdg_6_sum, sdg_7_sum, sdg_8_sum, sdg_9_sum, sdg_10_sum, sdg_11_sum, sdg_12_sum,	The amount disbursed to the individual Sustainable Development Goal, by the donor to a recipient in a given year, in 2020 Constant USD. This value is calculated by splitting the project disbursement values based on the SDG target codes, then aggregating from target to goal levels.

sdg_13_sum, sdg_14_sum, sdg_15_sum, sdg_16_sum, sdg_17_sum	
sdg_1_n_proj, sdg_2_n_proj, sdg_3_n_proj, sdg_4_n_proj, sdg_5_n_proj, sdg_6_n_proj, sdg_7_n_proj, sdg_8_n_proj, sdg_9_n_proj, sdg_10_n_proj, sdg_11_n_proj, sdg_12_n_proj, sdg_13_n_proj, sdg_14_n_proj, sdg_15_n_proj, sdg_16_n_proj, sdg_17_n_proj	<p>The number of projects with disbursement to the individual Sustainable Development Goal with a dollar value greater than zero. Aggregated by the donor to a recipient in a given year.</p> <p>Note: as the SDG coding process applies multiple goal codes to projects that address multiple thematic areas at once, these counts may not equal the sum represented in the “total_proj” column.</p>
env_sum	<p>The amount disbursed to projects which specify environmental protection or policy, but do not include a component specifically aligned with the current environmental Goals (Goals 13, 14, and 15). Aggregated by the donor to a recipient in a given year, in 2020 Constant USD.</p>
env_n_proj	<p>The number of projects with disbursement to projects which specify environmental protection or policy, but do not include a component specifically aligned with the current environmental Goals (Goals 13, 14, and 15), with a dollar value greater than zero. Aggregated by the donor to a recipient in a given year.</p> <p>Note: as the SDG coding process applies multiple goal codes to projects that address multiple thematic areas at once, these counts may not equal the sum represented in the “total_proj” column.</p>
non_sdg_sum	<p>The amount disbursed to projects that were not directly aligned with the Agenda 2030 targets, by the donor to a recipient in a given year, in 2020 Constant USD.</p>
non_sdg_n_proj	<p>The number of projects with disbursements with a dollar value greater than zero, but which did not specify activities directly linked to the Agenda 2030 targets. Aggregated by the donor to a recipient in a given year.</p> <p>Note: as the SDG coding process applies multiple goal codes to projects that address multiple thematic areas at once, these counts may not equal the sum represented in the “total_proj” column.</p>

## **Data Sources and Brief Methodological Notes**

This dataset uses project-level data on ODA, OOF, Private Development Finance, and Equity Investment (2000-2021) reported to the OECD Creditor Reporting System (CRS).

AidData's prior *Estimating Baseline Aid* approach drew upon OECD CRS data, and assigned SDG codes to a project based on the activities identified in the project title and descriptions. This approach provided a granular level of detail, and captured the SDG elements of multi-sector projects more comprehensively than previous efforts. However, this method relied on a large team of student researchers and multiple stages of review and consolidation. For reference, 36 different student researchers coded 104 thousand projects over two years of that methodology's implementation. With these labor requirements, any SDG-coded data would be at least three years out of date by the time it was reviewed and ready for publication.

Nevertheless, the dataset that the students compiled, once complete, proved to be an invaluable training dataset for modern machine learning algorithms. Distinguishing across the 2030 Agenda's 169 targets introduces a high degree of complexity, and machine learning algorithms required tens of thousands of sample projects to properly model this complexity (for further detail, see *Autocoding Finance to the Sustainable Development Goals Methodology, forthcoming, AidData*). With an internal database of hundreds of thousands of projects coded by trained researchers, and more advanced text classifiers open to the public in 2022, AidData's team were finally able to upgrade our process and toolkit. With the new machine-learning tools, we have the ability to overcome prior delays and produce updated SDG data and analysis within a few months of development data publication, not within a few years.

This methodology is based on automated analysis of development project descriptions and titles. Where activity descriptions were insufficient to assign an SDG code, the v1.0 coder relied on OECD CRS purpose codes, which were not as granular as activity descriptions, and generate estimates based on a naïve diffuse assumption about what activities were involved in a project with a given purpose code.

The methodology involves three main steps:

1. Mapping first-level activities to SDG targets;
2. Training a text-classification tool leveraging three text-classification models on a dataset where this mapping has been hand-coded, then processing new data with this tool;
3. Splitting an aid project across designated activities; and
4. Splitting activity amounts across SDG targets, as a purpose code may be linked to multiple targets. For further detail, see *Autocoding Finance to the Sustainable Development Goals Methodology, forthcoming, AidData*.

While we recognize that components of an aid project may receive differing levels of resources in practice, the available project documentation seldom contains this level of granularity on how money is distributed at the sub-project level. Therefore, we split dollar values equitably across the naïve diffuse assumption of activities included in each purpose code, the best available option in the absence of perfect information. Having split the dollar value of a project across unique activities, we distribute those activity-dollar amounts evenly across the SDGs goals associated with the “parent” purpose code.

For more detailed information on the statistical methodology, please refer to our forthcoming methodology white paper *Autocoding Finance to the Sustainable Development Goals Methodology*.

### Appendix C: CRS Purpose codes and SDGs

<b>Goal</b>	<b># activities</b>	<b>Purpose code names</b>
Goal 1	14	social/ welfare services; disaster prevention and preparedness
Goal 2	76	basic nutrition; agriculture, purpose unspecified or does not fit under any other applicable codes; agricultural policy and administrative management; agricultural development; agricultural land resources; agricultural water resources; agricultural inputs; agricultural education/training; agricultural research; agricultural services, purpose; forestry development; fishery development; fishing development; fishery education/training; fishery research; fishery services; food aid/food security programmes
Goal 3	48	health policy and administrative management; medical education/training; medical services; basic health care; basic health infrastructure; infectious & parasitic disease control; malaria control; tuberculosis control; COVID-19 control; health education; health personnel development; population policies/ programmes and reproductive health, purpose unspecified or does not fit under any other applicable codes; population policy and administrative management; reproductive health care; family planning; std control including hiv/aids; personnel development for population and reproductive health; industrial development
Goal 4	52	education facilities and training; teacher training; primary education; basic life skills for youth and adults; early childhood education; secondary education; vocational training; higher education; advanced technical and managerial training; medical education/training; tourism policy and administrative management
Goal 5	3	family planning; strengthening civil society
Goal 6	26	water supply and sanitation, purpose unspecified or does not fit under any other applicable codes; water resources policy and administrative management; water resources protection; water supply and sanitation - large systems; basic drinking water supply and basic sanitation; river development
Goal 7	30	energy generation and supply, purpose unspecified or does not fit under any other applicable codes; energy policy and administrative management; power generation/non-renewable sources; power generation/renewable sources; electrical transmission/ distribution; gas distribution; petroleum distribution and storage; industrial development

Goal 8	47	economic and development policy/planning; child soldiers (prevention and demobilisation); employment policy and administrative management; banking and financial services, purpose unspecified or does not fit under any other applicable codes; financial policy and administrative management; monetary institutions; formal sector financial intermediaries; informal/semi- formal financial intermediaries; education/training in banking and financial services; business support services and institutions; business education and training; agricultural services, purpose; forestry services; fishery services; small and medium-sized enterprises (sme) development; cottage industries and handicraft; tourism policy and administrative management; women in development; non-agricultural alternative development
Goal 9	110	education facilities and training; primary education; secondary education; higher education; basic health infrastructure; water supply and sanitation - large systems; river development; water research; government administration; social/ welfare services; road transport; rail transport; water transport; air transport; communications, purpose unspecified or does not fit under any other applicable codes; communications policy and administrative management; telecommunications; radio/television/print media; information and communication technology (ict); communications, education and training.; energy research; banking and financial services, purpose unspecified or does not fit under any other applicable codes; financial policy and administrative management; formal sector financial intermediaries; business support services and institutions; agricultural development; agricultural water resources; fishery services; industry, purpose unspecified (includes manufacturing of goods not specified below) or does not fit under any other applicable codes; industrial policy and administrative management; industrial development; small and medium-sized enterprises (sme) development; cottage industries and handicraft; industry education and training; technological research and development; industry services; mineral resources and mining, purpose unspecified or does not fit under any other applicable codes; mineral/mining policy and administrative management; mineral/metal prospection and exploration; mining education / training; construction policy and administrative management; tourism policy and administrative management; urban development and management; rural development; import support (capital goods)
Goal 10	6	social/ welfare services; financial policy and administrative management
Goal 11	52	waste management/disposal; social/ welfare services; housing policy and administrative management; transport and storage, purpose unspecified or does not fit under any other applicable codes; transport policy and administrative management; road transport; rail transport; water transport; air transport; education and training in transport and storage; agricultural

		development; biosphere protection; site preservation; flood prevention/control; urban development and management; rural development; disaster prevention and preparedness
Goal 14	6	fishing policy and administrative management; fishery development; fishery research; biosphere protection
Goal 15	27	agricultural land resources; forestry, purpose unspecified or does not fit under any other applicable codes; forestry policy and administrative management; forestry development; forestry education/training; forestry research; forestry services; bio-diversity
Goal 16	120	education policy and administrative management; primary education; secondary education; higher education; health policy and administrative management; population policy and administrative management; water resources policy and administrative management; government and civil society, purpose unspecified or does not fit under any other applicable codes; economic and development policy/planning; public sector financial management; legal and judicial development; government administration; strengthening civil society; conflict prevention and resolution, peace and security, purpose unspecified or does not fit under any other applicable codes; security system management and reform; civilian peace-building, conflict prevention and resolution; post-conflict peace-building (un); reintegration and salw control; land mine clearance; child soldiers (prevention and demobilisation); social/ welfare services; employment policy and administrative management; housing policy and administrative management; transport policy and administrative management; communications policy and administrative management; information and communication technology (ict); energy policy and administrative management; electrical transmission/distribution; financial policy and administrative management; monetary institutions; business support services and institutions; agricultural policy and administrative management; forestry policy and administrative management; fishing policy and administrative management; industrial policy and administrative management; mineral/mining policy and administrative management; construction policy and administrative management; trade policy and administrative management; trade facilitation; tourism policy and administrative management; environmental policy and administrative management; women in development; urban development and management; rural development; disaster prevention and preparedness
Goal 17	29	population policy and administrative management; public sector financial management; social/ welfare services; business support services and institutions; trade policy and regulations, purpose unspecified (includes trade and trade promotion activities) or does not fit under any other applicable codes; trade policy and administrative management; trade facilitation;

		regional trade agreements (rtas); multilateral trade negotiations; rural development; export support; action relating to debt; debt forgiveness; relief of multilateral debt; rescheduling and refinancing
ENV	NA	We also include a general code identifying projects which specify environmental protection or policy, but do not include a component specifically aligned with the current environmental Goals (Goals 13, 14, and 15). This is largely a consequence of the prior MDG era encouraging generalized “environmental” projects rather than the specific “Life on Land” and “Life in the Sea” approaches.

## **Data Use Recommendations**

### **Using Data in Spreadsheets**

Microsoft Excel has known limitations when working with CSV files that have character encodings like UTF8 (the character encoding of the AidData CSV Data). To avoid potential problems with character encodings, please use the “From Text” command on the Data menu when opening the CSV files. Double-clicking on the files to open in Excel, and/or saving them as CSV from Excel may result in character encoding problems. Additionally, NO version of Excel will be able to successfully open a table the size of the FULL research release (> 3.16 million rows). 65536 is the maximum number of spreadsheet rows supported by Excel 97, Excel 2000, Excel 2002 and Excel 2003 (Excel 2007, 2010, 2013, 2016, 2019, and Excel 365 support 1,048,576 rows). Data Tables files that are larger than those numbers cannot be imported to these versions of Excel. LibreOffice and OpenOffice support 1,048,576 rows. If you don’t need the full datasets with all the project records, the pre-aggregated datasets may be of use to you. There are also other options for working with large data tables including:

- OpenRefine ( <http://openrefine.org/> ): a free tool for working with large datasets which will let you facet, trim and export the data as you desire, then perform additional operations outside of the tool;
- R: CSV files are easily readable by R using the the native data import commands found in the language ( <https://www.datacamp.com/community/tutorials/r-data-import-tutorial>)

- STATA: STATA also provided native CSV import commands ( <http://www.stata.com/manuals13/dimportdelimited.pdf> )
- Python: Python provides CSV import and analysis through the Pandas module ( <http://pandas.pydata.org/> ) and the read\_csv command ( [https://pandas.pydata.org/pandas-docs/stable/user\\_guide/io.html](https://pandas.pydata.org/pandas-docs/stable/user_guide/io.html) )

Please note that the full dataset has a large memory footprint. It is recommended that your computer have at minimum 4GB of RAM (8GB of RAM recommended) if being loaded into Python/R/STATA. Otherwise, we recommend computing summary statistics on a year-by-year basis to only load one table at a time, if possible.

**Deflation:** All financial values are deflated to USD2020.

## **Licensing Agreement**

### DATA LICENSE AND ATTRIBUTION

ODC Attribution License (ODC-By)

#### **### Preamble**

The Open Data Commons Attribution License is a license agreement intended to allow users to freely share, modify, and use this Database subject only to the attribution requirements set out in Section 4.

Databases can contain a wide variety of types of content (images, audiovisual material, and sounds all in the same database, for example), and so this license only governs the rights over the Database, and not the contents of the Database individually. Licensors may therefore wish to use this license together with another license for the contents.

Sometimes the contents of a database, or the database itself, can be covered by other rights not addressed here (such as private contracts, trademark over the name, or privacy rights / data protection rightsover information in the contents), and so you are advised that you may have to consult other documents or clear other rights before doing activities not covered by this License.

-----The Licensor (as defined below)andYou (as defined below)agree as follows:

#### **### 1.0 Definitions of Capitalised Words**

"Collective Database" – Means this Database in unmodified form as part of a collection of independent databases in themselves that together are assembled into a collective whole. A work that constitutes a Collective Database will not be considered a Derivative Database.

"Convey" – As a verb, means Using the Database, a Derivative Database, or the Database as part of a Collective Database in any way that enables a Person to make or receive copies of the Database or a Derivative Database. Conveying does not include interaction with a user through a computer network, or creating and Using a Produced Work, where no transfer of a copy of the Database or a Derivative Database occurs.

"Contents" – The contents of this Database, which includes the information, independent works, or other material collected into the Database. For example, the contents of the Database could be factual data or works such as images, audiovisual material, text, or sounds.

"Database" – A collection of material (the Contents) arranged in a systematic or methodical way and individually accessible by electronic or other means offered under the terms of this License.

"Database Directive" – Means Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, as amended or succeeded.

"Database Right" – Means rights resulting from the Chapter III ("sui generis") rights in the Database Directive (as amended and as transposed by member states), which includes the Extraction and Re-utilisation of the whole or a Substantial part of the Contents, as well as any similar rights available in the relevant jurisdiction under Section 10.4.

"Derivative Database" – Means a database based upon the Database, and includes any translation, adaptation, arrangement, modification, or any other alteration of the Database or of a Substantial part of the Contents. This includes, but is not limited to, Extracting or Re-utilising the whole or a Substantial part of the Contents in a new Database.

"Extraction" – Means the permanent or temporary transfer of all or a Substantial part of the Contents to another medium by any means or in any form.

"License" – Means this license agreement and is both a license of rights such as copyright and Database Rights and an agreement in contract.

"Licensor" – Means the Person that offers the Database under the terms of this License. "Person" – Means a natural or legal person or a body of persons corporate or incorporate.

"Produced Work" – a work (such as an image, audiovisual material, text, or sounds) resulting from using the whole or a Substantial part of the Contents (via a search or other query) from this Database, a Derivative Database, or this Database as part of a Collective Database.

"Publicly" – means to Persons other than You or under Your control by either more than 50 percent ownership or by the power to direct their activities (such as contracting with an independent consultant).

"Re-utilisation" – means any form of making available to the public all or a Substantial part of the Contents by the distribution of copies, by renting, by online or other forms of transmission.

"Substantial" – Means substantial in terms of quantity or quality or a combination of both. The repeated and systematic Extraction or Re-utilisation of insubstantial parts of the Contents may amount to the Extraction or Re-utilisation of a Substantial part of the Contents.

"Use" – As a verb, means doing any act that is restricted by copyright or Database Rights whether in the original medium or any other; and includes without limitation distributing, copying, publicly performing, publicly displaying, and preparing derivative works of the Database, as well as modifying the Database as may be technically necessary to use it in a different mode or format.

"You" – Means a Person exercising rights under this License who has not previously violated the terms of this License with respect to the Database, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

Words in the singular include the plural and vice versa.

### **### 2.0 What this License covers**

2.1. Legal effect of this document. This License is: a. A license of applicable copyright and neighbouring rights; b. A license of the Database Right; and c. An agreement in contract between You and the Licensor.

2.2 Legal rights covered. This License covers the legal rights in the Database, including: a. Copyright. Any copyright or neighbouring rights in the Database. The copyright licensed includes any individual elements of the Database, but does not cover the copyright over the Contents independent of this Database. See Section 2.4 for details. Copyright law varies between jurisdictions, but is likely to cover: the Database model or schema, which is the structure, arrangement, and organisation of the Database, and can also include the Database tables and table indexes; the data entry and output sheets; and the Field names of Contents stored in the Database; b. Database Rights. Database Rights only extend to the Extraction and Re-utilisation of the whole or a Substantial part of the Contents. Database Rights can apply even when there is no copyright over the Database. Database Rights can also apply when the Contents are removed from the Database and are selected and arranged in a way that would not infringe any applicable copyright; and c. Contract. This is an agreement between You and the Licensor for access to the Database. In return you agree to certain conditions of use on this access as outlined in this License.

2.3 Rights not covered. a. This License does not apply to computer programs used in the making or operation of the Database; b. This License does not cover any patents over the Contents or the Database; and c. This License does not cover any trademarks associated with the Database.

2.4 Relationship to Contents in the Database. The individual items of the Contents contained in this Database may be covered by other rights, including copyright, patent, data protection, privacy, or personality rights, and this License does not cover any rights (other than Database Rights or in contract) in individual Contents contained in the Database. For example, if used on a Database of images (the Contents), this License would not apply to copyright over individual images, which could have their own separate licenses, or one single license covering all of the rights over the images.

### **### 3.0 Rights granted**

3.1 Subject to the terms and conditions of this License, the Licensor grants to You a worldwide, royalty-free, non-exclusive, terminable (but only under Section 9) license to Use the Database for the duration of any applicable copyright and Database Rights. These rights explicitly include commercial

use, and do not exclude any field of endeavour. To the extent possible in the relevant jurisdiction, these rights may be exercised in all media and formats whether now known or created in the future. The rights granted cover, for example: a. Extraction and Re-utilisation of the whole or a Substantial part of the Contents; b. Creation of Derivative Databases; c. Creation of Collective Databases; d. Creation of temporary or permanent reproductions by any means and in any form, in whole or in part, including of any Derivative Databases or as a part of Collective Databases; and e. Distribution, communication, display, lending, making available, or performance to the public by any means and in any form, in whole or in part, including of any Derivative Database or as a part of Collective Databases.

3.2 Compulsory license schemes. For the avoidance of doubt: a. Non-waivable compulsory license schemes. In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme cannot be waived, the Licensor reserves the exclusive right to collect such royalties for any exercise by You of the rights granted under this License; b. Waivable compulsory license schemes. In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme can be waived, the Licensor waives the exclusive right to collect such royalties for any exercise by You of the rights granted under this License; and, c. Voluntary license schemes. The Licensor waives the right to collect royalties, whether individually or, in the event that the Licensor is a member of a collecting society that administers voluntary licensing schemes, via that society, from any exercise by You of the rights granted under this License.

3.3 The right to release the Database under different terms, or to stop distributing or making available the Database, is reserved. Note that this Database may be multiple-licensed, and so You may have the choice of using alternative licenses for this Database. Subject to Section 10.4, all other rights not expressly granted by Licensor are reserved.

#### **### 4.0 Conditions of Use**

4.1 The rights granted in Section 3 above are expressly made subject to Your complying with the following conditions of use. These are important conditions of this License, and if You fail to follow them, You will be in material breach of its terms.

4.2 Notices. If You Publicly Convey this Database, any Derivative Database, or the Database as part of a Collective Database, then You must: a. Do so only under the terms of this License; b. Include a copy of this License or its Uniform Resource Identifier (URI) with the Database or Derivative Database, including both in the Database or Derivative Database and in any relevant documentation; c. Keep intact any copyright or Database Right notices and notices that refer to this License; and d. If it is not possible to put the required notices in a particular file due to its structure, then You must include the notices in a location (such as a relevant directory) where users would be likely to look for it.

4.3 Notice for using output (Contents). Creating and Using a Produced Work does not require the notice in Section 4.2. However, if you Publicly Use a Produced Work, You must include a notice

associated with the Produced Work reasonably calculated to make any Person that uses, views, accesses, interacts with, or is otherwise exposed to the Produced Work aware that Content was obtained from the Database, Derivative Database, or the Database as part of a Collective Database, and that it is available under this License. Please use this notice:

Burgess, B., Bengtson, A., and B. Lautenslager. (2023). Financing the 2030 Agenda for Sustainable Development, Version 1.0. Williamsburg, VA. AidData. Accessed at <http://aiddata.org/XXXXX>.

4.4 Licensing of others. You may not sublicense the Database. Each time You communicate the Database, the whole or Substantial part of the Contents, or any Derivative Database to anyone else in any way, the Licensor offers to the recipient a license to the Database on the same terms and conditions as this License. You are not responsible for enforcing compliance by third parties with this License, but You may enforce any rights that You have over a Derivative Database. You are solely responsible for any modifications of a Derivative Database made by You or another Person at Your direction. You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License.

### **### 5.0 Moral rights**

5.1 Moral rights. This section covers moral rights, including any rights to be identified as the author of the Database or to object to treatment that would otherwise prejudice the author's honour and reputation, or any other derogatory treatment: a. For jurisdictions allowing waiver of moral rights, Licensor waives all moral rights that Licensor may have in the Database to the fullest extent possible by the law of the relevant jurisdiction under Section 10.4; b. If waiver of moral rights under Section 5.1 a in the relevant jurisdiction is not possible, Licensor agrees not to assert any moral rights over the Database and waives all claims in moral rights to the fullest extent possible by the law of the relevant jurisdiction under Section 10.4; and c. For jurisdictions not allowing waiver or an agreement not to assert moral rights under Section 5.1 a and b, the author may retain their moral rights over certain aspects of the Database. Please note that some jurisdictions do not allow for the waiver of moral rights, and so moral rights may still subsist over the Database in some jurisdictions.

### **### 6.0 Fair dealing, Database exceptions, and other rights not affected**

6.1 This License does not affect any rights that You or anyone else may independently have under any applicable law to make any use of this Database, including without limitation: a. Exceptions to the Database Right including: Extraction of Contents from non-electronic Databases for private purposes, Extraction for purposes of illustration for teaching or scientific research, and Extraction or Re-utilisation for public security or an administrative or judicial procedure. b. Fair dealing, fair use, or any other legally recognised limitation or exception to infringement of copyright or other applicable laws.

6.2 This License does not affect any rights of lawful users to Extract and Re-utilise insubstantial parts of the Contents, evaluated quantitatively or qualitatively, for any purposes whatsoever, including creating a Derivative Database (subject to other rights over the Contents, see Section 2.4). The repeated and systematic Extraction or Re-utilisation of insubstantial parts of the Contents may however amount to the Extraction or Re-utilisation of a Substantial part of the Contents.

### **### 7.0 Warranties and Disclaimer**

7.1 The Database is licensed by the Licensor "as is" and without any warranty of any kind, either express, implied, or arising by statute, custom, course of dealing, or trade usage. Licensor specifically disclaims any and all implied warranties or conditions of title, non-infringement, accuracy or completeness, the presence or absence of errors, fitness for a particular purpose, merchantability, or otherwise. Some jurisdictions do not allow the exclusion of implied warranties, so this exclusion may not apply to You.

### **### 8.0 Limitation of liability**

8.1 Subject to any liability that may not be excluded or limited by law, the Licensor is not liable for, and expressly excludes, all liability for loss or damage however and whenever caused to anyone by any use under this License, whether by You or by anyone else, and whether caused by any fault on the part of the Licensor or not. This exclusion of liability includes, but is not limited to, any special, incidental, consequential, punitive, or exemplary damages such as loss of revenue, data, anticipated profits, and lost business. This exclusion applies even if the Licensor has been advised of the possibility of such damages.

8.2 If liability may not be excluded by law, it is limited to actual and direct financial loss to the extent it is caused by proved negligence on the part of the Licensor.

### **### 9.0 Termination of Your rights under this License**

9.1 Any breach by You of the terms and conditions of this License automatically terminates this License with immediate effect and without notice to You. For the avoidance of doubt, Persons who have received the

Database, the whole or a Substantial part of the Contents, Derivative Databases, or the Database as part of a Collective Database from You under this License will not have their licenses terminated provided their use is in full compliance with this License or a license granted under Section 4.8 of this License. Sections 1, 2, 7, 8, 9 and 10 will survive any termination of this License.

9.2 If You are not in breach of the terms of this License, the Licensor will not terminate Your rights under it.

9.3 Unless terminated under Section 9.1, this License is granted to You for the duration of applicable rights in the Database.

9.4 Reinstatement of rights. If you cease any breach of the terms and conditions of this License, then your full rights under this License will be reinstated: a. Provisionally and subject to permanent termination until the 60th day after cessation of breach; b. Permanently on the 60th day after cessation of breach unless otherwise reasonably notified by the Licensor; or c. Permanently if reasonably notified by the Licensor of the violation, this is the first time You have received notice of violation of this License from the Licensor, and You cure the violation prior to 30 days after your receipt of the notice.

9.5 Notwithstanding the above, Licensor reserves the right to release the Database under different license terms or to stop distributing or making available the Database. Releasing the Database under different license terms or stopping the distribution of the Database will not withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

### **### 10.0 General**

10.1 If any provision of this License is held to be invalid or unenforceable, that must not affect the validity or enforceability of the remainder of the terms and conditions of this License and each remaining provision of this License shall be valid and enforced to the fullest extent permitted by law.

10.2 This License is the entire agreement between the parties with respect to the rights granted here over the Database. It replaces any earlier understandings, agreements or representations with respect to the Database.

10.3 If You are in breach of the terms of this License, You will not be entitled to rely on the terms of this License or to complain of any breach by the Licensor.

10.4 Choice of law. This License takes effect in and will be governed by the laws of the relevant jurisdiction in which the License terms are sought to be enforced. If the standard suite of rights granted under applicable copyright law and Database Rights in the relevant jurisdiction includes additional rights not granted under this License, these additional rights are granted in this License in order to meet the terms of this License.
